EDUCATION

Sep 2018 - Sep 2019

IMPERIAL COLLEGE LONDON, Masters Degree - MSc Computing Science - *Merit*

- Individual Project: Visualizing the Open Digital Rights Language
- Group Project: Enhancing Robot Navigation via Global Localisation and 3D Obstacle Detection

Sep 2015 - Apr 2018

UNIVERSITY OF CALIFORNIA SANTA CRUZ, Undergraduate Degree

BA Economics Business Management (Dean's Honors multiple quarters) - *Honors*

WORK EXPERIENCE

Feb 2024 - Present

UK GOVERNMENT HOME OFFICE, Software Engineer (Senior Executive Officer) - London, United Kingdom

- Designed and developed critical Java backend microservices using the Spring framework with Postgres databases in a Test Driven Development manner, including RESTful APIs, external tool integrations, transaction management, cron jobs, Kafka streams and OAuth2.
- Enhanced code quality and general engineering practices by recommending security-focused refactors, boosting backend code coverage from 75% to 89%, wrote test data generation scripts and database connection bash scripts to disburden local testing.
- Delivered product demonstrations while having to tailor presentations to accommodate audiences with diverse technical and business backgrounds.
- Identified and documented bugs through thorough manual local and lower environment application testing, as well as setting up unit testing and stubs and mocks for efficient integration testing.
- Collaborated with business analysts, designers and senior stakeholders to understand and address user requirements.

May 2021 - Jan 2024

MYTUTOR, Software Engineer L1 $\Rightarrow$ Software Engineer L2 (Jan 2023) - London, United Kingdom

- Developed Java backend and React frontend microservices with Kafka, Spring, and MySQL in a TDD manner to enhance matching algorithms, RESTful APIs, and integrate Stripe payment solutions.
- Strategically extracted functionality from legacy monolithic application by designing and implementing appropriate Kafka streams with the correct keys for partitioning and retention configurations.
- Optimized Hibernate queries in Java applications by reducing database query execution time by up to 30% through query refactoring.
- Wrote a shared library for error code functionality reducing code duplication across teams.
- Researched and presented talks on Domain Driven Design and AWS Gateways.
- Worked with product managers and designers to refine stories and explore the challenges for sprints.
- Communicated with relevant colleagues outside of cross functional squad for specific user stories.

Sep 2019 - Apr 2021

IMPACTBOX, Developer - London, United Kingdom

- Helped build core functionality and integration pieces in Java, Python (using Django framework), Apex and SOQL (Salesforce), SQL, Javascript, HTML and Vue.js
- Led projects to deliver solutions that met client needs and provided post-project support.
- Collaborated with clients to understand their requirements and provide code-based support throughout project lifecycle.

SKILLS

Java · Spring framework · Kafka · RESTful APIs · JUnit & Integration Testing · TDD · SQL · Docker · Kubernetes · Grafana · MAXQDA

LANGUAGES

English (*Native*) · French (*Native*) · Italian (*Intermediate*) · Swiss German (*Elementary*)

VOLUNTEERING

Jul 2021 - Mar 2024

ACTION TUTORING, Mathematics Tutor Year 5/6

Held weekly online tutoring sessions with 1 to 3 pupils during term time.

OTHER

UNIVERSITY COLLEGE LONDON, MSc Public Policy
(Part-time 1 Year)

CERTIFICATIONS

Salesforce Certified Platform Developer I
(expired 2021)
